COVID-19 Status Update

Clayton Controls and Clayton Engineered Solutions remain open and able to support all of our customers.

Clayton Controls and Clayton Engineered Solutions has been deemed an "essential business". We will continue to remain open and operate during the current California "Stay At Home Order". There are no delays to quoting, order processing, or shipments. We will continue to update our status.

We are closely monitoring the recent COVID-19 developments and have a plan in place to respond to prospect and client needs as quickly as possible, and to move product out the door without disruption. We took early precautions to prevent the spread by implementing alternative work arrangements and processes for our employees wherever possible.

One process change we are taking very seriously is working with our clients by electronic means whenever and wherever possible. Our staff is ready and available by video conferencing, phone, or email to maintain the highest level of client service and safety.

Clayton Controls and Clayton Engineered Solutions is committed to the health and safety of our employees. For the employees who remain to ensure we do not impact the supply chain of our customers, we are taking very aggressive steps to ensure their health is not compromised at work.

Thank you for your continued business, please let us know if we can be of assistance as we remain open.

Regards,

Chris Brown
President
